Kaiser Sends for American Dentist.

COPENHAGEN, via London, May 13.—Emperor William recognizes no state of war with the United States so far as his personal comfort is concerned. This is shown by the fact that he has summoned his American dentist, Arthur Newton Davis of Piqua, Ohio, to visit him at Great Headquarters this week and attend to the imperial teeth.

Throughout the long months of tension between Germany and the United States the imperial and royal family and the highest cials of the state have continued to patronize their respective American dentists. Each new crisis was marked by an almost ludicrous rush of royalties and others to get their teeth attended to before the

possible departure of the American dental experts.

The Emperor apparently accepts the official interpretation of his Government, which in a communication regarding the continuance of the Belgian relief work speaks not of war but of the "abandonment of neutrality" by the United States.
